Cardinal Flower (*Lobelia cardinalis*)

Anise Hyssop (*Agastache foeniculum*)

Sweet Black-Eyed Susan

Blue Sage

Virginia Mountain Mint

With brilliant yellow plumes, goldenrod is a quintessential fall-blooming plant. Goldenrod is a crucial nectar source for pollinators in the fall, including Monarchs!

Plant a variety of asters for a gorgeous array of colors in your fall garden, from purple and blue to pink and white. They offer a late-season buffet for pollinators and birds.

Joe Pye Weed boasts large, dome-shaped clusters of pink or purple flowers that attract butterflies and other pollinators, making it an essential component of a fall wildlife garden.

Liatris species offer stunning purple stalks of flowers that provide nectar for pollinators like bees and butterflies and seeds that birds eat during late summer and fall.

With vibrant red blooms and lush green foliage, Cardinal Flower attracts pollinators and hummingbirds, providing late-season nectar.
